

JOIN LIVE PROJECTS TRAINING AND DEVELOPMENT

Are You Already a Trained Professional and Still Not Getting Jobs

Then you must have problems with your practical knowledge in web development. We have found that 80% of the candidates don't get jobs in the industry even after going through training programs in web development because they lack real life project experiences.

There are professionals, who want to shift from one field to another, say from database management to programming, because they think there are better career opportunities in that field. But, again, they do not get their first openings simply because they do not have live project experience in that field.

You can join us and get trained in one of our live projects under the guidance of a highly experienced team of projects managers. At any point in time, we have multiple **PHP live projects, ASP.NET live projects, web designing live projects, and software testing live projects running in our organization** for you to choose from. Moreover, you will get opportunities to work in our own development centre of Webslate Software.

Each of our projects will give you a working experience in complete life cycle of project from designing the project specifications, to creating database, communicating with the client, programming the project, hosting, beta testing and taking care of client feedback. We have seen that once a student completes our live projects, 100% of them get multiple job opportunities. Each of our projects will give you a working experience in complete life cycle of project from designing the project specifications, to creating database, communicating with the client, programming the project, hosting, beta testing and taking care of client feedback. We have seen that once a student completes our live projects, 100% of them get multiple job opportunities.
